

The only catalytic converter anti-theft device that alerts you of theft in progress

The CATrak anti-theft solution significantly reduces catalytic converter theft and notifies the owner of a theft in progress. Used by consumers and major fleets alike, CATrak is the only Smart-System available capable of communicating real time status.

The CATrak device is installed in minutes using a proprietary cut detect trigger (CDT). Once the CDT is powered by the vehicle's battery, the temperature resistant harness is affixed directly to the exhaust, which activates the 140dB siren and SMS text alert if it is tampered with.

Contact us today to find out how CATrak's solution can prevent and mitigate catalytic converter theft.

How it works

1. Prevent

If the CATrak warning stickers don't deter a thief, a 140dB siren is triggered when the exhaust system is tampered with.

2. Alert

The CATrak App alerts vehicle owner of theft in progress. An unlimited number of App contacts enables multiple sources of response.

3. Locate

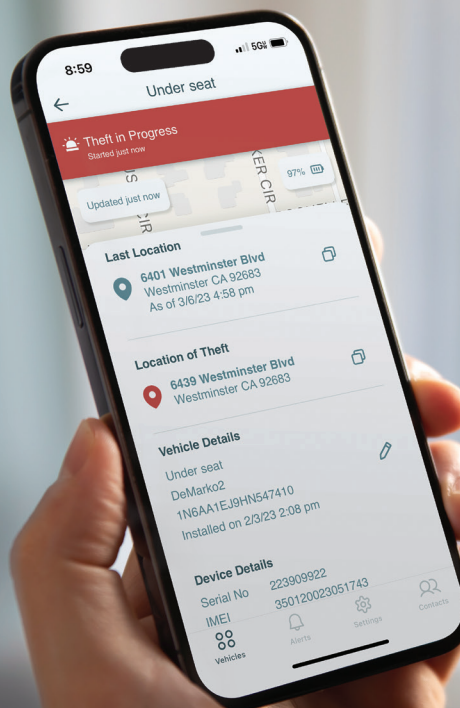

The CATrak App instantly displays theft location and vehicle details logging date and time.

4. Intercept

The App alerts patrols or individuals that can be quickly deployed to stop the thief in action.

5. Recover

The vehicle's VIN number is paired with the device during setup to allow for owner's identification and recovery.

The CATrak Advantage

The only anti-theft device that alerts your smartphone of a theft IN PROGRESS.

CATrak App immediately displays the location, time and vehicle details.

The powerful, covertly mounted **140dB alarm** is an excellent deterrent.

CATrak App can be used to notify anyone of a theft in progress.

Any number of vehicles can be monitored via the App.

CATrak is simple to set up.
